

I personally benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere in particular for me being a salesman on the road. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM and Sirius' ability to provide the kind of programming that we demand and deserve. Satellite radio is another competitive medium and competition between terrestrial and satellite radio will only help the CONSUMER. Please do NOT pass any legislation that hinders satellite radio from providing localized content. Respectfully,

Andy Sharpe
